Featured Projects

Battleship | <https://github.com/jamescr757/Battleship> May 2022

Description: This full-stack application is built with Node, Express, React, and JavaScript to render the Battleship game. **This is the capstone project, and I will fork it to my github account and update once completed.

Recipe App | <https://github.com/DezSays/Recipe-React-App> April 2022

Description: This application uses the Spoonacular API, pulling the images, recipes, cuisines, and key words for search purposes. This application was implemented using React.

Media Recommendations | https://github.com/DezSays/Media_Recommendations March 2022

Description: This application uses the IMDb API when searching for a movie or tv show, and the TasteDive API is used to populate six recommendations.

Blackjack Game | github.com/DezSays/Blackjack_Game March 2022

Description: This application is designed to play a simple Blackjack game, implemented using JavaScript.

Professional Experience

Interactive Search Marketing | Analysis + Facilitation February 2015 – January 2019

Marble Hill, GA

Dezarea is here to ensure that your website's technical functionalities and online marketing strategies are maintained and working effectively.
